W05-P1: add w04 link in index.html

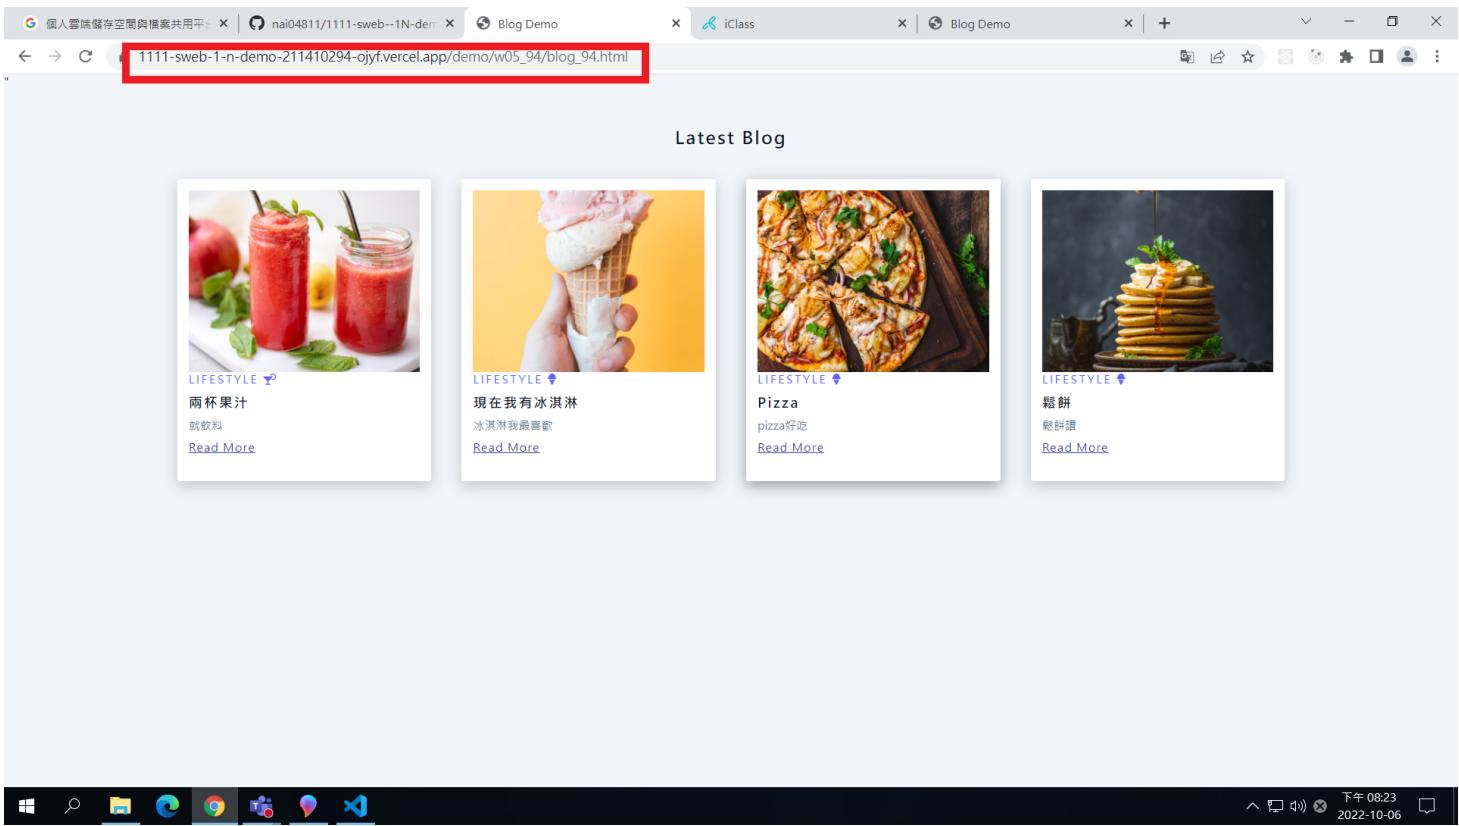

W05-P2: get 9 photo using small sizes

W05-P3: Use grid to show 4 photos in a row

The screenshot shows a code editor (VS Code) and a browser window side-by-side. The code editor has a red box highlighting a section of the HTML code where a grid layout is used to display multiple blog posts. The browser window shows the resulting layout with four cards arranged in a row. The developer tools in the browser are open, showing the CSS properties for the grid container and items, specifically the `grid-template-columns: 1fr 1fr 1fr 1fr;` rule.

W05-P4: Add w05 link in index.html, and show it in Vercel

W05-P5: Using css grid with minmax to display 9 photos

The screenshot shows a browser window displaying a blog page titled "Using Grid". The content is arranged in a 3x3 grid of nine items. The developer tools on the right side highlight the CSS code for the grid container, specifically the ".blog-center2" class.

```
/* CSS code from developer tools */ .blog-center2 { display: grid; grid-template-columns: minmax(12rem, 1fr); gap: 1rem; width: var(--fluid-width); max-width: var(--max-width); margin: 0 auto; max-width: 500px; }
```
